INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference KN8371-S.WBH	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/EP 98/ 07728	International filing date (day/month/year) 30/11/1998	(Earliest) Priority Date (day/month/year) 28/11/1997
Applicant ASEA BROWN BOVERI AB et al.		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☒ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

2

☐ None of the figures.

INTERNATIONAL SEARCH REPORT

International Application No

PCT/EP 98/07728

A. CLASSIFICATION OF SUBJECT MATTER
IPC 6 H02K3/40

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 6 H02K H01F H01B B60M B60L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 5 036 165 A (ELTON RICHARD K ET AL) 30 July 1991 see column 2, line 27 - line 58; figure 1 ---	1-30
A	DE 40 22 476 A (THYSSEN INDUSTRIE ;KABELMETAL ELECTRO GMBH (DE)) 16 January 1992 see column 3, line 11 - column 4, line 33; figure 3 ---	1-30
A	FR 2 108 171 A (SUMITOMO ELECTRIC INDUSTRIES) 19 May 1972 see page 2, line 34 - line 38; figure 1 ---	1-30
A	GB 913 386 A (ALLMANNA SVENSKA ELECTRISKA AKTIENBOLAGET) 19 December 1962 see page 2, line 67 - line 91; figure 2 ---	1-30
	-/--	

☒ Further documents are listed in the continuation of box C.

☒ Patent family members are listed in annex.

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

Date of the actual completion of the international search

28 April 1999

Date of mailing of the international search report

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP98/07728

I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

Description, pages:

1-22 as originally filed

Claims, No.:

1-30 as originally filed

Drawings, sheets:

1/12-12/12 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP98/07728

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	1-30
	No:	Claims	
Inventive step (IS)	Yes:	Claims	
	No:	Claims	1-30
Industrial applicability (IA)	Yes:	Claims	1-30
	No:	Claims	

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

V. Reasoned statement

1. The present application contains eight independent claims, each directed to an electricity supply system for traction, said supply systems being known per se as acknowledged by the applicant (and disclosed in the preambles of said independent claims), said independent claims being all characterized by the same features concerning the insulation of the windings of the transformers or rotating converters included in said electricity supply systems.

The present application does not satisfy the criterion set forth in Article 33(3) PCT because the subject-matter of independent claims 1, 2, 6, 9, 11 and 17-19 does not involve an inventive step (Rule 65(1) (2) PCT).

2. Document US,A,5036165 (=D1) discloses the winding of a dynamo-electric machine, the insulation of said winding consisting of two semiconducting layers, each layer providing a substantially equipotential surface, and solid insulation between said semiconducting layers.

The subject-matter of claims 1, 2, 6, 9, 11 and 17-19 differs therefrom in that said winding is employed in transformers or rotating converters included in electricity supply systems such as the supply systems illustrated at the left-hand sides of figures 3-7, at the right-hand sides of figure 8, and at figures 9 and 13 of the present application, which are typical supply systems of the prior art as specifically stated by the applicant, see lines 30-34 of page 14, lines 14-16 of page 18, lines 14-16 of page 19, and lines 17-20 of page 21 of the present application.

It would be obvious for the person skilled in the art, namely when the same result is to be achieved, to employ such a known winding according to the above-mentioned document D1 in transformers or rotation converters of the known electricity supply systems of the above-mentioned figures, thereby arriving at the supply systems of claims 1, 2, 6, 9, 11 and 17-19.

The subject-matter of claims 1, 2, 6, 9, 11 and 17-19 does therefore not involve an inventive step (Article 33(3) PCT).

3. Documents DE,A,4022476 (=D2), FR,A,2108171 (=D3) and GB,A,913386 (=D4)

disclose each substantially the same features as D1.

Therefore also on the grounds of the teachings of D2-D4 claims 1,2, 6, 9, 11 and 17-19 do not involve an inventive step, for the same reasons as see par. 2 hereabove.

4. The subject-matter of dependent claims 3,-5, 7, 8, 10, 12-16 and 20-30 does not appear to involve an inventive step in combination with the subject-matter of the claim to which it is appended, for the details disclosed in these claims are either already known or appear to be of the nature of workshop variations of details readily envisaged by persons skilled in the art. See also the documents cited in the search report.

The subject-matter of claims 3,-5, 7, 8, 10, 12-16 and 20-30 therefore does not involve an inventive step (Article 33 (3) PCT).

VII. Certain defects in the application

1. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2 (b) PCT).

VIII. Certain observations on clarity

1. The application contains eight independent claims of the same category, giving rise to the objection that the claims **as a whole** are not clear and concise as required by Article 6 PCT.
